Software Developer | Mobile Developer | IOS Developer

I have been developing projects in the Frontend Developer field for a long time and I want to continue to improve myself in this field. I have a broad skill set that will be applied in different institutions. I am innovative and future-oriented enough to meet high business skills.

Specialties: Swift, UIKit, JavaScript, TypeScript, React, React Native, Node.js, MongoDB

Technologies: Redux, Socket.io, Storybook

EDUCATION

Pamukkale University | Bachelor of Engineer, CENG, Computer Engineering

June 2023

EXPERIENCE

IOS Developer Bootcamp Student | UP School & Akbank | İstanbul

June – September 2023

- In this Bootcamp I am learning on iOS development on Swift and UIKit. I developed applications during Bootcamp.

Frontend Developer | Aselsis | Denizli

March – June 2023

- Developed a website where teachers upload solution videos of the trial exams taken by students of a private school, where students can watch videos and follow their own results.
- I used technologies like Next.js, Tailwind, Typescript, Context.

Frontend Developer Intern | VBT Software | İstanbul

June - August 2022

- The company interactively explained how and for what they use all the technologies they use when developing software products.

Frontend Developer Intern | Kodpit Technology | Denizli

June - September 2021

- Developed and published my Planning Your Life Project. I used technologies like React, Redux, Node.js, MongoDB.

PROJECTS

Word Race | [GitHub](#) | [Live Demo](#)

JavaScript, React, React Native, Redux, Node.js, Express, MongoDB, AWS EC2, Socket.io, Firebase, Material UI

- Developed a website using MERN stack and mobile application using React Native. Screens are designed by using Figma.
- Implemented atomic design for client side. Socket.io for real time multiplayer game and online chat structure.
- Constructed an End-to-End backend system with Node.js, MongoDB, CyberPanel and hosted on AWS EC2.

News App | [GitHub](#)

Swift, UIKit, Firebase, Alamofire, Localize Swift

- It is a news application where the user can view the news, filter by category, add to favorites and search. User can dark mode the app and change the language of the app. Developed with MVVM pattern.

Pomodly | [Live Demo](#)

Next.js, Node.js, webRTC, Socket.io, Tailwind

- With soothing sounds, you can set the time yourself and add tasks. You can do pomodoro online with your friend.

Planning Your Life | [GitHub](#) | [Live Demo](#)

JavaScript, React, Redux, Node.js, Express, MongoDB, AWS EC2, Bootstrap

- Developed a website using MERN stack.
- Constructed an End-to-End backend system with Node.js, MongoDB, CyberPanel and hosted on AWS EC2.
